

Important Note
for your
AC Volt-Ammeter
Cat. No. 22-161A

The test leads supplied with your meter are rated at 1200 Volts. If these leads are lost or damaged, replace them only with test leads rated at at least 1200 Volts. Replacement leads are available at your local RadioShack store.

Warning: Even though the test leads are rated at 1200 Volts, your meter can safely measure up to only 600 Volts. Never exceed your meter's maximum voltage rating, as doing so could damage the meter or the equipment you are testing and could expose you to a severe shock or burn hazard.
